July Meeting Women's Institute

Mesdames Clever and Cowell were joint hostesses to the Champion W. I., at their regular monthly meeting on Tuesday afternoon the 12th inst. In the absence of the president, Mrs. D. Watkins, 1st vice-president occupied the chair. An address by Mrs. F. C. Alcock was the principal feature of the afternoon's programme, the subject being "Canadian National Life," which dealt with the early history and discovery of the country, the influence of the different nationalities in building it up, the coming of the Mounted Police, Canada's contribution to the South African and World wars, and finally the traits of character, such as loyalty to high traditions, resourcefulness, generosity, tolerance and faith in one's country, which are all combined in the true Canadian. Undesirable immigrants should not be allowed to colonize," said Mrs. Alcock, while making a special plea for the preservation of the language which binds the Empire. "Not only big crops, but great men, are needed to make a country," said the speaker.

A very complete review of "Current Events," by Mrs. A. W. Jopling was listened to with great interest. Piano solos by Lona Stephenson and Anna Baker made a pleasing interlude. Following the singing of the National Anthem, the twenty-three ladies present were treated to delicious refreshments, including ice cream and home grown strawberries by the hostesses and Mrs. Watkins assisted by Mrs. Boner. Two new members joined.

Correspondence

The following letter, having reference to an item published last week, was received by the editor. This article was contributed by an associate of the McGregor Lake baseball club and I think if the writer will investigate she will find that he is the biggest "fish-eater" of them all.

We wish to thank the writer of the item in last week's Chronicle, concerning Archie Ruggles' "Fish Eaters," as he calls them.

In the opinion of the public, the McGregor Lake boys are not quite what the writer accuses them of being.

As for being "Fish Eaters," we are quite positive that the writer is more of a "Fish Eater" than any one of them.

As for still being hungry, Beware, you will be on the bread line before any of those boys. (Mrs. A. Ferguson)

At the home of Mrs. Albert Barr, nee Miss Vesper Maynard, Los Angeles, California, on June 23, Mrs. Rose Wright, daughter of Mrs. Adams, formerly of Champion, was quietly married to Mr. John Barr of Los Angeles. Twenty six were present and the young son of Mrs. Albert Barr acted as ring bearer. After a short trip to Escondido Mr. and Mrs. Barr made their home in Los Angeles. Mrs. Barr was widely known in this district.

Mr. and Mrs. U. S. Alexander have as their guest Mr. Alexander's aunt, Miss Day Spaulding, of Hollywood, California.

Local & General

Mrs. Bond and Donald are stampede visitors this week. Mr. and Mrs. Guy Volney are Calgary visitors.

I. Granlin and J. Kulpas were Calgary visitors Saturday.

Miss Marjorie Hopkins, of the Holy Cross Hospital, Calgary, is home on her vacation.

Mrs. Gatenby and family are spending the holidays at Medicine Hat.

Mr. and Mrs. F. J. Clapp were Lethbridge visitors on Tuesday.

Mr. and Mrs. A. M. Watt and family of Brant were the guests of Dr. and Mrs. H. N. Heal over the week end.

Mr. and Mrs. I. Fisher and O. Starr were called to Browning, Montana due to the serious illness of their father, Mr. F. Starr.

Mrs. Campbell, Mrs. Freeze, Miss Cameron, Miss Rheta Campbell and Andrew Anderson motored to Lethbridge Friday.

Mr. and Mrs. Walter Harris are receiving congratulations on the birth of a daughter Sunday July 10.

Mr. and Mrs. J. Roebuck left Sunday for Edmonton where they will be the guests of Mr. and Mrs. T. J. Watts for a few days.

Gardens have met with serious damage, and in some cases are practically gone, due to beet worms.

Mr. and Mrs. N. J. Patterson wish to thank the Women's Institute and Ladies' Aid for flowers received during Mrs. Patterson's illness.

There will be no dance this Saturday night as the boys are playing at Willow Creek, Stavelly, for the one Saturday.

Mr. and Mrs. Fred Watts left Thursday for a two weeks vacation to be spent at Rimby Alberta.

Master Jimmy and Walter Anderson left Sunday for Calgary where they will be the house guests of Master Bobby Freeze for the Stampede week.

Mr. D. D. Farmer accompanied by the Misses Helen and Geraldine left for Trochu Sunday to spend a few days visiting friends there.

A number from Champion motored to Willow Creek Sunday and spent the day at the picnic grounds. A few remained for the Midnight Frolic in the Willow Creek hall, with Len Davis and his orchestra supplying the music.

Rev. and Mrs. Dawson left for Camrose and other northern points for their vacation. Rev. Brunton of Vulcan will occupy the pulpit during Rev. Dawson's absence.

Champion girls softball team were successful in taking the long end of a 13-1 score when they met the girls from Twin Coulee on Friday last.

Mr. and Mrs. Irl Ditto, A. W. Jopling, Mr. and Mrs. Adams, A. A. Adams and Mr. and Mrs. Harry Smith were among those who attended the Stampede at Calgary Monday.

Clark Rhodes, Ernest Rhodes and W. E. Anderson returned from a fishing trip to the north fork of the Old Man River. They report that fishing was very poor due to so much rain making the streams high and muddy.

NOTES AND COMMENT

The land! That is where our roots
are. There is the basis of our physical
life. The farther we get away
from the land, the greater our insecurity.
From the land comes everything
that supports life, everything
we use for the service of physical life.
The land has not collapsed or shrunk
in either extent or productivity. It
is there waiting to honor all the labor
we are willing to invest in it, and able
to tide us across any dislocation of
economic conditions.

If the northlands holds any secrets,
Jack Hornby knew them, they say.
Hornby died in 1927 in a remote sec-
tion of the Thelon River country, in
northern Alberta, while searching for
gold. Two young Englishmen—cous-
ins of his—died with him. Now, five
years after starvation killed the "my-
stery prospector," a group of miners is
prepared to spend money to find out
if Hornby was right—that there is
gold in rich quantities in Thelon
River. The party will leave Edmon-
ton this summer for the north.
Samples of almost pure gold quartz
were found beside Hornby's body
when it was discovered many months
after his death. Nobody knows where
the veterans got them. If Hornby
was ahead of the prospecting world in
finding gold in the Thelon River
country, it will be another who profits.

To pass along in front of the ex-
hibits in the new World's Grain Show
building at Regina in 1933 will neces-
sitate a walk of almost two miles.
During this short trip the visitor will
have seen something of the habits, in-
dustries, hopes and aspirations of over
40 countries, provinces and states who
will participate in some form or other.

While our better composers may be
mildly envious of the success of their
"Tin Pan Alley" cousins as measured
in financial terms, they are not en-
vious to the extent of digging up
old scores.

The Atlantic Ocean shrivels again.
Fliers James Mattern and Bennett
Griffin leave New York at morning.
leave Newfoundland at evening. 15
hours later land in Berlin. In a week
they expect to be home—having cir-
cled the globe. Poor little globe!

Canada hears Parliamentary mem-
bers attack and defend the United
States over the Chicago lake water
diversion matter, sees a mob by air-
plane to the new radium field at sub-
arctic Great Bear Lake, and finds
that only 5,000,000 American autos
checked into Canada in 1931.

Considering the way the quotations
on stocks and bonds have been going
back and forth, one of the lams in-
quires if the stock exchange seats
have been made into rocking chairs.

Hawaii spends \$2,000,000 to increase
employment and to improve highways
on which the motorist gets more miles
of beauty to the gallon than almost
anywhere else in the world.

A careful landlady is judicious about
the roomers she accepts and requires
that they present good references.
All might well do the same about
rumors.

It seems strange that frozen assets
should make it so not for a business
concern.

Now that someone in Texas has
developed a tearless onion, perhaps
one may try just for joy.

Increased Resort To London Of Canadian Borrowers Shows New Financial Trend

Successful flotation of two provincial bond issues in the London market is accepted by New York bankers as a forerunner of increased borrowing by Canadian borrowers in the London market during the current period of financial strain and unsettled exchange, says the New York Herald-Tribune.

The paper refers to the placing of British Columbia's \$1,500,000 of its issue in London in May, which was quickly oversubscribed at 90, and of \$1,000,000 Alberta's recently at 95.

"The new trend," says the paper, "is somewhat of a tribute to the London new issues market, which recovered its poles last December."

"It remains the opinion of almost all competent authorities that the Canadian dollar will be eventually re-established on a parity with that of the United States, notwithstanding the present discount of nearly 15 per cent. on Montreal funds in New York. The close inter-relationships of United States and Canadian business interests, and the large aggregate of Canadian gold bonds, held in this country, are considered ample assurance of eventual exchange parity. Nor is it thought that such parity will be difficult to achieve or maintain in a normal world."

"It is accepted here that the Canadian borrowing in London had the tacit approval of the highest banking authorities in England."

"This assumption is justified, since the effect on the exchanges accords with impressions prevalent here in regard to London financial policy. All exchange transactions between Montreal and London are mediated by New York. Canadian borrowing in London means, therefore, that additional pressure will be exerted to depress the British currency unit in terms of the United States dollar while a favorable effect will be exerted on the Canadian unit in terms of the dollar."

"That London is averse to any substantial rise in sterling has been shown by the establishment of the stabilization fund. The effect of Canadian borrowing in London coincides with the operation of that fund, and it is therefore assumed that encouragement will be given the flotation of Canadian bond issues in London."

Sounds Reasonable

Establishing City Man On Farm

Might Not Pay

A prominent citizen of Pennsylvania, realizing that unemployed city workers have no means to establish themselves in the country, proposes that the State should finance them in the purchase of farms, stocking them with horses, cows, chickens and pigs, and supplying them with tools and seed. That kind of aid might be welcome to a genuine "back-to-the-lander" who had been brought up in the country, but how can it benefit the man who has never known of life outside a city? He couldn't tell a cow-die! tell a horse's crupper from his headstall, he is helpless when he seats himself on a milking-stool at a cow's flank, he has the vaguest idea or none at all as to the proper feeding and care of swine. Even the comparatively simple procedure of keeping a flock of poultry in good fettle is Greek to him. You might as well bring a discouraged farmer to the city and expect him to make a success of running a beauty-parlor or a high-class specialty shop.

Exports of beef from Alberta in 1931 totalled 100,000,000 pounds, according to the annual report of the Provincial Livestock Commissioner.

The United States imported 284,000 pounds of garlic last year.

To Protect Industry

Ask For Strengthening Of "Empire-Consent" Regulations In Britain

British Conservatives want a stiffening of the "Empire-Consent" regulations which stipulate the percentage of Empire labor or materials that must be contained in goods entering under the Imperial preferences.

The central council of the United Union of Conservative Associations, meeting in London, with 500 delegates present, unanimously passed a resolution demanding the government take steps to amend the regulations, which at present call for an Empire content of 25 per cent.

The resolution complained that present United States manufacturers are able to use Canada and the Irish Free State as corridors for the export into Britain of goods mainly of United States origin, thus evading the general duties and defeating the object for which they were imposed.

American Railways Hard Hit

Net Loss Of 76 Millions In First Four Months Of Year

A net loss of \$76,489,492 during the first four months of the current year was shown in the net income of the principal Class I steam railways of the country, according to a tabulation of the Interstate Commerce commission based on reports of 146 Class I steam railways. This compares with a net income of \$99,610 for the corresponding period of last year.

The net loss for April amounted to \$2,682,737 compared with a net income of \$2,923,005 for that month in 1931.

"That London is averse to any substantial rise in sterling has been shown by the establishment of the stabilization fund. The effect of Canadian borrowing in London coincides with the operation of that fund, and it is therefore assumed that encouragement will be given the flotation of Canadian bond issues in London."

A CHARMING LITTLE MODEL

THIS: YOUNG, DAINTY AND VERBATE

It can be carried in a great many different fabrics. It all depends upon whether young daughter wishes to wear it for parties, "best" or everyday occasions.

For parties, tulle, crepe de chine or chiffon is darning in pale blue, pink or daffodil yellow.

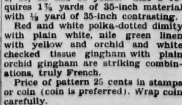

For simple "best," a crepe de chine print in light navy blue and white is cute idea as skirt and blouse that merges into caplet sleeves is plain navy crepe. It's most practical.

Style No. 290 is designed for sizes 8, 10, 12 and 14 years. Size 8 requires 1 1/2 yards of 35-inch contrasting. Red and white polka-dotted dimity with plain white, silk green line with yellow and orchid and white checked tissue gingham with plain orchid gingham are striking combinations, fully French.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

GEORGE E. CARTER WINS PROMOTION

Succeeds George A. Walton as General Passenger Agent C.P.R.

George E. Carter, Assistant General Passenger Agent of the Canadian Pacific Railway, is appointed General Passenger Agent Eastern Lines, with headquarters at Montreal, effective July 1st, according to an announcement made by H. O. McMillan, Assistant General Passenger Manager. His successor is the late George A. Walton, who died on the "Empress of Australia" at sea, on May 18. The position of Assistant General Passenger Agent now held by Mr. Carter will not be filled. This decision was reached in view of the need of economy during current business conditions, and reduces the number of Assistant General Passenger Agents to five.

Mr. Carter's promotion is to the highest position in the gift of the Passenger Department, following a career marked by steady advancement. He was promoted to the position of Assistant General Passenger Agent in 1928.

GRAVE READY FOR LIGHTHOUSE KEEPER

Taking Up Duties at Bahamas

When a lighthouse keeper takes up his duties in the lighthouse of one of the far-flung Bahamas, he finds a grave of solid rock awaiting him. He knows that the "light" is all-important and another keeper could not take time off to dig him a grave. He also knows that because of the heat he will inhabit his final rock-bed dwelling before sundown in the day he dies.

This "novel" death insurance scheme was explained in an interview by E. H. Syer, resident engineer of the Imperial Lighthouse Service, on furlough in Canada. He is in charge of the 12 Imperial Government lighthouses of the Bahamas.

A Berlin inventor has perfected a projector for throwing advertisements on mountain sides.

The United States and China propose the largest amount of poultry.

"The tourist rushed into the village shop. 'I want a quart of oil, some petrol, a couple of sparking plugs, a five-gallon paraffin can, and four pins.'"

"All right," replied the enterprising clerk, "and you can assemble 'em in the back room if you want to."

Wood Menace

Effective Method Of Securing A Clear Seed Crop

This is the time of the year when the roguish of the seed crop should be carefully watched—among the most troublesome of which are the weeds. Bladder Canaan, Catch Fly, Couch Grass, Rib Grass, Ragweed, Ox-eye Daisy, and Perennial Sow Thistle—and only by effective policing methods can the best quality of seed crop be secured. As the Dominion Seed Branch points out, growers should police their fields carefully and be prepared to resort to liberal roguing where necessary in order to ensure that their seed will be free from impurities which too often render otherwise good seed of no market value whatever. Roguing, or pulling weeds by hand, before they have gone to seed, is the most effective method of making sure of securing a clean seed crop.

Expedition Into North

May Attempt To Locate Rich Gold and Silver Properties

Captain James C. Critchell-Bullock of Vancouver, companion of the late John Hornby during his wanderings in the sub-Arctic barrens of the North West Territories, may lead an expedition into the north in an attempt to locate rich gold, silver and radium properties.

"Hornby was the original discoverer of the Great Bear Lake radium area," Critchell-Bullock declares.

"During his wanderings in the barrens he made many other important discoveries, and before he died he turned over to me most of his samples, his diaries and his maps."

One of these samples, assayed recently in Vancouver, shows values of \$180,000 in the ton in free gold, Captain Critchell-Bullock said.

Prepared For Emergency

Grave Ready For Lighthouse Keeper

When a lighthouse keeper takes up his duties in the lighthouse of one of the far-flung Bahamas, he finds a grave of solid rock awaiting him. He knows that the "light" is all-important and another keeper could not take time off to dig him a grave. He also knows that because of the heat he will inhabit his final rock-bed dwelling before sundown in the day he dies.

This "novel" death insurance scheme was explained in an interview by E. H. Syer, resident engineer of the Imperial Lighthouse Service, on furlough in Canada. He is in charge of the 12 Imperial Government lighthouses of the Bahamas.

Eminent French Professor Declares There Is No Such Thing As The Gulf Stream

Requires Team Work

If Every Frenchman Were Careful Fewer Accidents Would Occur

Last year 571 people were killed by motor vehicles in Ontario; 841 people lost their lives by drowning and there were 204 deaths caused by falls. That makes a total of 1,738 lives that were snuffed out by what might correctly be called preventable accidents, or what in plain speech would be called carelessness or recklessness. What that total will be this year, of course, remains in the lap of the gods, but judging by the fatalities already reported, it will contain a number rather than a lesser number, unless people are prepared to give greater thought and consideration to this matter.

Schools closed for the holidays and thousands of children are free too many of them, to roam at their own sweet will. Will anything serious happen this time?

Surely it will, unless the parents and older people force into their minds the absolute necessity of being careful on the streets, on the roads, at the swimming hole and at other places dear to the heart of childhood.

But all the fatalities will not fall among the children, and very few will really be caused by them. One can assume that that fact.

What about the man or the woman who drives at thirty or forty miles an hour on the streets of a town, or at something approaching double that speed on the roads and highways leading to and from these towns? Are they trying to prevent collisions? Or have they even a thought of danger in their minds?

Contrary to a very general belief it isn't always the other fellow who is at fault in an accident. Accidents have a way of happening in all places, not just in one, and there is no one cause for them, but many.

If taking a little more time and being a little more careful would help to reduce this amazing total of preventable accidents, is it not the duty of every man and every woman to give this time and care?

Tariff Pleasuries

U.S. Attitude Fute An End To Possibility Of Neighbory Trade

Colonel W. L. McGregor, president of the Canadian Chamber of Commerce, got a few things off his chest and on to the necks of the American Chamber of Commerce in convention assembled at San Francisco. Referring to tariff pleasantries between Canada and the United States, he says right out that the Americans started the game. The Smoot-Hawley Act is described as putting an end to fifty years of Canadian effort to trade with the United States. Furthermore, the newly threatened restrictions upon Canadian lumber and copper exports come in for rough handling. It is not much good trying to do business with a people who agree to nothing to buy from us, although they sell us one-quarter of their exports, says the colonel. In the classic phrase, he is not arguing with the Americans; he is just telling them—Montreal Star.

Hundred Acres Of Roses

Two New Varieties Yearly Is Bohemia Gardeners' Record

Blatina, in southwest Bohemia, was but little known to the outside world in pre-war days. Only the antiquarian interested in its late Gothic church, or the tourist informed of its delightful little castle set in the midst of a great and lovely park, would think it worth while to drop there before passing on to the larger and more historically more interesting towns of Pleik and Strakonice. But today it has become the end of an annual pilgrimage for thousands of tourists and others from all parts of central Europe. For there has been established by Jan Boehm a plant of over one hundred acres of roses.

To the horticulturist, Blatina is a constant source of reference. For Jan Boehm is a continuous experimenter, and his results are eagerly followed by experts in this part of Europe. He places upon the market two new roses each year. Some of his recent introductions include the Maury's Jubilee rose, the "Bozena Nemova," named after a famous Czech novelist of the nineteenth century and which is described as a "rose without a thorn," a "Briand-Panepuro" and a "Kraus Ushavanka" rose of two colors.

In addition to his own species, Boehm grows all kinds of roses, German, French, English and hybrid. The fact that Blatina lies about 1300 feet above sea level and is exposed to the sharp winds of the Bohemian Forest would have suggested to a less daring man that this was an impossible spot in which to cultivate roses. What has actually happened is that Boehm has produced roses which are of a hardy sort, inured to cold and well able to stand rough climate—Christian Science Monitor.

Keeps Business Moving

The head of one of the largest firms of cereal manufacturers announces that it is adding a cool million dollars to its advertising appropriation for the current year. The bulk of this appropriation will be spent with newspapers. And some people operating much smaller concerns still persist in thinking that advertising does not pay.

Raw Silk Exported From Japan

Raw silk exported from Japan last year weighed 20 per cent. more than the 1930 shipments.

Professor George La Dannois

of the French Sea Fisheries Bureau says "There is no such thing as the Gulf Stream." This, says the New York Sun, is his ultimatum. He hopes that this categorical statement will put an end to the conjectures inspired by reports concerning the inconstancy of the river in the North Atlantic.

The suppression of the Gulf Stream by the eminent French oceanographer is a hard blow to romance. Nothing like it has been reported since grim science abolished the fabled sea of adventure tales and condemned to death all those interesting colonies of hopelessly pient voyagers that were held captive in its entangling web. The Sargasso Sea had a fire and a fauna of its own, each as rich as the discoverer's imagination; its human population was said to be in the circumstances set by the story itself required.

The Sun reminds us that the Gulf Stream plays a different but no less interesting part in story. It is responsible for the cold, wet seasons that afflict the western coast of the United States and the northwestern coast of Europe. When strange fish appear, the Gulf Stream brings them; when families disappear, the Gulf Stream takes them away. Outside the Hydrographic Office—a strangely perverse institution so unenterprising that it refuses to be guided by astronomers' reports—the principal function of the Gulf Stream is to change its course. Not a season passes in which its driftings are not well recorded everywhere on the official charts.

It is a fortunate thing that Professor La Dannois did not reveal the Gulf Stream while Benjamin Franklin was Ambassador to France. Poor Richard was a firm believer in the great current, and he would have stood up for it. Even now there are those who, despite the frailty of Professor La Dannois's pronouncement, will hope for its reinstatement. Perhaps it was merely in recess when Professor La Dannois looked at the place where it should have been.

Of Ourselves.

Bruce Barton, the well known author and magazine writer, has proposed the toast: "To the only folks who can make us or break us—To Ourselves." And he quotes the saying of Carlyle: "The world's being saved will not save us, nor the world's being lost destroy us. We should look to ourselves."

The truth of these statements differently worded but meaning exactly the same thing, cannot be gainsaid. The biggest factor in the world now, as always, is the individual. No man is actually down and out, defeated, unless and until he himself admits defeat. Furthermore, more people are destroyed by prosperity than by adversity; more people fall to grasp and enjoy the realities of life when the gods are showering them with riches or other gifts than when they are faced with difficulties and confronted with seemingly unmovable problems.

It is then people being to call upon latent powers they possess. William James, in his essay on "Vital Reserves," pointed out that underneath our daily store of strength and courage, all of us have reserves that are tapped only by emergency. We are all able, under the test, to surprise ourselves with an unsuspected capacity to be and do more.

It is that capacity which is our greatest asset. It is our hope in the present and for the future. It is ours to employ now.

The writer is acquainted with a man resident in one of our prairie cities who lost his position over a year ago. He has a bed-ridden wife not only to support but to care for. He is a plain, middle-aged man, and his position received only a small salary. Did he despair and call upon the Government to put him "on relief"? Not a bit of it! He called upon his own reserves of strength. Although he had no experience, he got a job painting a garage. This led to other small jobs. Then at Christmas time he got work soliciting orders on a commission basis. When spring came he hunted up garden work to do. Thus he kept going. He is seldom idle because he is willing to take on any kind of a job, no matter how humble. And when you meet him he always has a new job to tell. He goes whistling on his way, scornful to accept Government or municipal relief, always looking forward to better days that must inevitably come, and in the meantime keeping his head well above water. He is a bigger, better man than ever before, and he maintained his self-respect and kept his courage, and, in the days to come, will command a better position than any he might have secured had "hard times" not descended upon him.

This is a very simple illustration of a very ordinary individual. Nevertheless he has and is displaying the spirit of a hero. Yet he possesses nothing that each and every person has not got, namely, a reserve of strength, of courage, of determination, to call upon in times of emergency. But the important thing is—he called those reserves into action. Too many of us fail to do this. We hesitate, we drift, we refuse to use the powers lying latent in us with which we have been endowed. In a word, we have not faith in ourselves, and without that faith anything that others may do for us will fall far short. Such people will come out of the present time of difficulty weaker and less well equipped to take advantage of the opportunities which the future will offer to us.

Let us put ourselves to the test. We have been buffeted about; we may be gasping, but if we are strong of heart and keep on we will get our "second wind." A race is on, and it is not over; we always have a chance to win until the tape at the finishing line is definitely broken. Our success or failure depends, not on the other fellow, but on ourselves.

Fast Ocean Travel Had Relief For Customer

Canada Now Only Week-End Journey From England

Canada is now only a "week-end" journey from England, thanks to the record-breaking crossings of the Atlantic by the C.P.'s "Empress of Britain," says Vancouver's foremost famous British newspaper magazine. Viscount Rothermere declares that the interval between the departure of the "Empress of Britain," passed Bishop's Rock lighthouse, off the Scilly Islands, and the time she reached the entrance to the Strait of Dover, was only 73 hours and 53 minutes. "The passage of the North Atlantic was made with only two nights spent out of sight of land," declared Viscount Rothermere's message, "after which the rest of the journey has been through smooth land-locked waters."

An Imposing Monument

Prince of Wales Will Dedicate War Memorial in France

One of the most imposing war memorials on French soil is that which is to be dedicated by the Prince of Wales at Thiepval, on the Somme, next March. The monument, which is nearing completion, will be composed of triumphal arches 140 feet high, and only five feet less in breadth. On the pillars will appear the engraved names of 73,867 British officers, N.C.O.'s and men.

The average annual income of physicians in the United States, as revealed by an American Medical Association survey, is \$9,674.

All Her Children Were Troubled With Diarrhoea

Mr. J. J. Bickert, R.R. 1, Enderby, B.C., writes:—

"Last Summer all my children were troubled with diarrhoea, and so we had I did not know what to do. A friend told me to give them Dr. Enderby's Extract of Wild Strawberry, so I got a bottle, and after a couple of days you should have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I find it the only one that cures so easily and quickly."

Dr. Enderby's
WILD
STRAWBERRY

Established For Centuries

History Of Many English Business Firms Is Interesting

Among the historic business firms of England is one which claims existence when the flames demolished mediæval London. This is Hedges and Butler, wine merchants, whose old lease forbade the shooting of snipe in that thoroughfare and who numbered Pitt, the Duke of Wellington, W. E. Gladstone, and Lord Beaconsfield among their customers. Yet another is G. W. Scott and Sons Limited, who made hoops for the dresses of the fashionable ladies in the days of Queen Anne and wicker frames for the baskinets of the Guards at Waterloo. Founded in 1600, Birch and Co., have since provided all the banquets for the City Corporation, and for 250 years have fed every crowned head and important man in Europe. The business remains famous for turtle soup and punch made from aged port, and the fine windows of their original shop now reposes in the London Museum. Also founded in 1600, Grosvenor, Carter and Co., were the coat stationers to the Bank of England. Queen Anne, a famous gourmet, liked the relishes made by Crose and Blackwell, into which firm Napoleon's chief, Quailotti, entered and invented the pickle. Piccilli, in 1783, it is interesting to note now that the tea duty in England has just been reimposed. Mr. Richard Twining, of R. Twining and Co., the tea merchants, was called in by Pitt to secure the removal of the Bank of England step which was taken. Two hundred and twenty-two years ago the Sun newspaper Office began business, and in 10 years issued 20,000 policies, insuring about 10,000,000, an enormous sum in those days. Telescope made by early Dollond and Sons, of London, were used by Nelson, Wellington and Napoleon, to C. T. Brock and Co., the ironworks of Birmingham, as an illegal trade for 155 years, firm working not being actually legalised till 1875.

Muskeg Has Its Use

Possibility It May Be Manufactured Into Wall Board

Muskeg, the moss-like substance that covers thousands of acres of Canada's treeless north country, has at last found a use. An inquiry recently received by the Board of Trade at the Van. Manitoa has led to a trainload of muskeg being shipped to Brampton, Ontario, for use in the manufacture of wall board.

Sitting in the midst of millions of tons of muskeg, long believed valueless, officials of the board were discussing the possibility of buying a dozen carloads or so. Negotiations are now in progress, and the board of the Board of Trade is looking into the possibility of getting a factory to locate there and use the material.

Asbestos Brings Misery, but Dr. D. K. Kellogg's Asbestos Remedy will replace the misery with welcome relief. Inhaled as smoke or vapor it reaches the very innermost recesses of the lungs, and soothes the inflamed tissues. Restriction passes and easy breathing follows. If you know as well how this remedy would help you as do the thousands of people who have used it, would be a practical gain to your home to have it. Try it.

High Tariff Walls

Action Of U.S. Forces a Severe Blow To Canadian Agriculture

The exports from Canada to the United States of principal commodities such as are produced in Canadian farms, or manufactured directly from such farm products, during the month of May amounted to \$2,337,340 in May, 1930, and \$8,044,888 in May, 1931, according to the Dominion Bureau of Statistics.

The high tariff walls erected by the United States, culminating in the Hawley-Smoot tariff in June, 1930, have a severe blow to Canadian agriculture, making the export of many commodities practically impossible.

During the eleven months ending May, 1932, the export of such commodities to the United States totalled \$6,632,429, compared with \$4,076,939 in the same period of 1929-30, and \$17,492,682 in the eleven months ending May, 1931.

With a duty of 42 cents per bushel on wheat, the export of Canada's chief agricultural product to the United States has been reduced to 200 in eleven months of the crop year 1929-30, to \$2,490,774 in 1931-32. Three cents per pound on beef cattle has caused a drop from \$2,182,824 to \$417,745.

Three dollars per head on sheep brought the export down from 11,666,213 to \$826. Butter at 14 cents per pound fell from \$2,289,221 to \$145,946, flaxseed at 65 cents per bushel from \$4,783,811 to \$573,709, potatoes at 70 cents per 100 pounds from \$6,557,031 to \$115,975. Corn at \$2.50 per bushel fell from \$2,369,292 to \$11,000. Of course, lowered prices have also had some effect upon the values.

Internally and Externally It Is Good.—The crowning glory of Dr. Thomas' Electric Oil is that it can be used internally for many complaints, as well as externally for sore throat, cough, whooping cough, pains in the chest, colds and many other ailments. It is a quality oil that is unsurpassed. A bottle of it costs only 25 cents and there is no loss in always having it at hand.

Evidently Not Known

The case came before a London coroner the other day of a man who had an income of nearly \$5,000 a year, had not a friend in the world. It cannot have been generally known that he had an income of nearly \$5,000 a year.

And now it is reported crocodiles do not cry. Next time they see someone will muster enough courage to declare there is no such thing as a weeping willow.

Food loses no nutritional value in canning, scientific experiments indicate.

Using Planes in Stampede

Wild Horses To Be Rounded Up From Air

Klamath Falls, Ore., plans the mightiest wild horse drive—from the air. Three airplanes will dip low over the plateau and pass, set the wild bands running, head them off the turns and finally stampede 2,000 of them. It is expected, into a gigantic trap in the lowlands. The finest stallions and mares, it is promised, will be allowed to escape again to the hills, but most of that vast catch will be slaughtered—for chicken feed. The automobile could replace the horse in man's heart, but not even the auto could chase him off the map. Only thunder-birds swooping down from the sky can bring extermination to those wise, fleet, liberty-loving muskies—can stampede them into poultry bait.—Christian Science Monitor.

Muskeg Has Its Use

Possibility It May Be Manufactured Into Wall Board

Muskeg, the moss-like substance that covers thousands of acres of Canada's treeless north country, has at last found a use. An inquiry recently received by the Board of Trade at the Van. Tracherous Police Dogs

Bringing These Animals Into Canada

Leslie Lake Macdonald, the Stratford-Bresford-Herald in connection with a case of a bad dog which was bitten in Toronto by a police dog, observes that breeders of dogs are agreed that it was a mistake to bring this dog to Canada. It has not the backbone and the courage of the Collie, the bulldog, the setter, St. Bernard, Newfoundland or any of the other well-known breeds of dogs to which we are accustomed. The police dog is a wild animal, and treacherous in the sense that he cannot be trusted not to take a bite at any moment.

Discouraged, especially for life.

The Man Who Walks

Cannot Afford To Relax Vigilance For a Moment

It must be admitted that the pedestrian today has a great chance. He must go about his lawful occupations, if society is to exist, and to do that he must frequent the streets and roads. Yet he is nowadays condemned to do so at the peril of being killed or maimed if he should be guilty of one error of judgment or one lapse of vigilance. He must live in a jeopardsy comparable to that of the troops in the front-line trenches during the War.—Morning Post, London, England.

Douglas' Egyptian Liniment, always quick, always certain. Stops bleeding instantly. Cuts, bruises, sprains, burns, etc. 50¢.

Two poems and a complete story, including altogether 8,100 words, have just been written on the two sides of an ordinary postcard. This record feat was performed by a resident of Munich, Germany.

It cost nearly \$12,000,000 to supply London with water in the last 12 months.

Sick from Heat

"Baby's Own Tablets are excellent for children's summer complaints," writes Mr. M. E. Connor, near Ottawa. "One of all children's remedies for summer ailments," writes Mrs. J. Walker, Thomas' Electric Oil.

With good management there is still money in farming. Fifty years ago an Ontario farmer paid \$500 for a farm and last week he sold it to a syndicate for \$550.

will thrive on Christie's pure Arrowroots

For the tiniest babies . . . for older children . . . for growing boys and girls . . . there is nothing more delicious and nourishing than Christie's Arrowroots. No substitute is good enough.

Christie's Arrowroots

Miracle Recorded In Church

Mosaic Panel Depicts Basket Of Bread And Two Fishes

A fourteenth century church, built during the reign of the Emperor Constantine the Great, has been uncovered near Tiberius, on the way to the Colosseum. This church commemorates the miracle of the loaves and fishes, performed by Jesus on the shores of the Sea of Galilee, and the actual mosaic said to have figured in the Gospel narrative as the boulder on which He stood has also been found in the corner of the church. It presumably lay beneath an altar. Behind the stone a wonderfully depicted mosaic panel was found depicting in vivid black, red and yellow a basket, several loaves of bread, and two fishes. Although buried beneath dust and rubble for about 1,600 years, and only a stone's throw from the sea, the mosaic shows no signs of erosion, and the colors are well preserved.

Good Service For Citizens

Toronto Health Department Furnishes Tablets To Purify Water

A notice published in Toronto papers says that free tablets for the purification of water can be obtained from the city health department by any citizen. These tablets are recommended for those going on picnic or on camping trips where there are no chances of having to use water of questionable purity. The tablets will purify water and make it fit for drinking in a few minutes.

British Exhibits Arriving Via Churchill

Directorate Of Grain Show Learns Plans Being Worked Out

Exhibits of British manufactured goods to be shown at Regina next year during the World's Grain Exhibition and Conference and Regina exhibition will arrive via Churchill. Plans with this object in view are being worked out, members of the directors board of the Regina Exhibition arrive via Churchill.

A special committee representative of the exhibition association, the city council, the board of trade and the World's Grain Exhibition is at work making plans for the British trade exhibit and have received gratifying responses from British manufacturers with whom they are in touch.

The exhibit will be housed in the present Confederation Building.

The Smiths Still Lead

Numerical Supremacy Still Maintained By People Of This Name

The most prominent family in the United States apparently maintains its numerical supremacy in about all departments of human activity. Not only do it use more telephones, but it holds more public offices, according to recently published evidence. In the second edition of "Who's Who in Government," which has just appeared with biographical data on more than 40,000 names, those who are holders in the United States, the Smith family is the largest on the public payroll.—The Journal, Providence.

Game Fish In North

Transferring Specified Trout Along Hudson Bay Railway Line

There is a possibility that game fish of the speckled trout variety will be transported from the streams along the Hudson Bay Railway to the Clearwater Lake summer resort and other adjacent waters by airplane or tank cars, so the lakes may be stocked for sportmen.

E. H. Stevenson, inspector of fishing, who is in Churchill, is at present engaged in making a survey of the waters destroyed by the Brazilian government in a recent week. This brings the total destroyed since policy of reducing the surplus production was adopted to 1,973,344 sacks.

With good management there is still money in farming. Fifty years ago an Ontario farmer paid \$500 for a farm and last week he sold it to a syndicate for \$550.

GREAT BRITAIN FAVORS BIG CUT IN ARMAMENTS

London, England.—Great Britain officially defined its attitude towards the United States proposal for a one-third cut in world armaments, generally welcoming the American plan, but producing considerable naval armament limitation proposals in lieu of the American naval plans which Great Britain does not think go far enough.

In a white paper read before the House of Commons by Stanley Baldwin, acting prime minister, the government pointed out Great Britain's world wide interests made it impracticable to reduce the number of naval units beyond a certain point.

"But, if there is a limit to numerical reduction, it is still possible, and highly desirable, to secure by other means a large diminution in naval armaments," Mr. Baldwin said.

He therefore proposed important reductions in the maximum size of future capital ships, aircraft carriers, cruisers and destroyers, with corresponding reduction in the maximum gun-calibers for each class.

So far as land armament is concerned, Great Britain has already entered standard standards which more than cover the United States. The British army has been cut from 230,000 in 1913 to 207,000 at present, Mr. Baldwin stated.

And in the air, Great Britain goes step by step with the United States. Great Britain's air force, indeed, is only 20 per cent. of the immediate post-war strength. Great Britain is prepared to support the abolition of the bombing of civilians, and gas and chemical bombing, along with limitations in size and number of aircraft. Great Britain will strictly limit the unladen weight of all military and naval aircraft, with the exception of troop carriers and flying boats.

Gas Conservation

National Gas Flares in Turner Valley Have Faded Out

Calgary, Alberta.—"Hell's half-acre," the sobriquet of Turner Valley, with its scores of giant natural gas flares painting the sky from 30 miles away a lurid crimson at night, is fading out.

Throughout the entire south end of the valley, not a flicker of light is to be seen. By the middle of the week, all the northern flares will also be extinguished and darkness—banned for eight years, will finally descend on the field.

The reason? Operators have finally yielded to the pressure for gas conservation and a government board is shutting in the tremendous high-pressure wells. Some of them like the original Royalty No. 1, have been shut in by October 14, 1924, have been continuously flowing over the Great Hyle well were only recently drilled in.

Lost Trapper Returns

Lindsey Bay, N.W.T.—Andy Nelson, lost seven days in the bush around Great Bear Lake, returned to his camp near Enkluine. Nelson had injured his ankle while making a short prospecting sally from camp, and then became confused in his direction. For seven days, without food, he wandered about and finally managed to take the correct route back to his camp.

Trapper Lost in Arctic

Ottawa, Ont.—James Aesels, lone Fijian islander, who for more than 20 years eked out an existence tramping along the Arctic coast and islands east of Coronation Gulf, is listed among the missing and is thought by the Royal Canadian Mounted Police to have perished on an ice floe north of the mainland of Canada.

Will Exhibit Again

Victoria, B.C.—British Columbia home producers, whose exhibits at the 1923 Imperial Fruit show in England won six out of nine prizes awarded for show, are to invade the show again this year.

Heavy Rail Shipments

Churchill, Man.—The number of rail shipments over the Canadian National line is increasing. There were 250 shipments of less-than-carloads last week, much of the material is going to northern outposts.

Gas Price Advance

Vancouver, B.C.—Wholesalers here and in Victoria announced an increase of two cents a gallon in the price of gasoline to retailers, making the wholesale price 20 cents a gallon.

W. N. U. 1900

Cocos Island Treasure Not Yet Uncovered

Head of Expedition Says Report of Success Unfounded

Panama City, Col. J. E. Locke, head of the Vancouver, B.C., expedition which is searching for buried treasure on Cocos Isle, off the coast of Costa Rica, witnessed the United States naval reserve station at Balboa, that reports the treasure had been uncovered were unfounded.

In a wireless conversation with the naval reserve station operator the operator of the expedition added: "How did anybody ever get the notion we would ever find anything on this God-forsaken island?"

The Balboa reserve station is the expedition's means of contact with the rest of the world and officials there said no message indicating the treasure had been found were transmitted lately.

J. Walter Young, engineer of the reserve station at Balboa, said Locke declared before he left Panama for Cocos Island: "If we find gold you'll never know it until after it is safely aboard the Canadian destroyers which are standing by the island in a line to take the treasure to Canada."

Ottawa, Ont.—"We hope the destroyers are there, for we need the money," was the comment of defence department officials. "However," added the officials, "we are rather afraid the destroyers are still to be found." The neighborhood of Equatorial, their home station.

Wheat At Churchill

Over 1,000,000 Bushels Of Wheat In Storage At Northern Port

Churchill, Man.—More than 1,000,000 bushels of the first order of 2,000,000 bushels of wheat to be shipped through this new port this summer, are now in the bins in the harbor, and the second order is rolling in from Saskatchewan points. It is expected 11 ships will be necessary to take away the first two orders of grain. There is much speculation here as to when they will arrive, but none as to how fast they can be loaded. Two or three days will do the job. If there are enough trained cargo trimmers on hand.

Four ocean steamers will be able to line up in a row, when the extension of the grain galleries is completed. They will be loaded in a day. The elevator was designed for a total capacity of 10,000,000 bushels. The first storage unit of 2,500,000 has been completed, and is being filled for the first time. Grain men state it will soon be necessary to increase the storage capacity since the investment in plant, equipment and machinery has been made for a much larger storage plant.

"Plane Crash In North"

Bodies Of Three Aviators Will Be Brought To Fort Smith

Edmonton, Alberta.—Bodies of Andy Crushbank and two air mechanics who died with him in a plane crash near Lake Mazenod, in the Northwest Territories, are likely to be brought to civilization for burial, it was learned here.

Pilot Walter Gilbert who found the crash site, Crushbank, one of the north's greatest aviators, and Horace Torrie and Henry King, mechanics, have a second flight to the lonely spot where the wrecked plane lies with the intention of taking the bodies to Fort Smith.

Mrs. Crushbank and Mrs. King are at Fort McMurray, radio station and trading post in northern Alberta, and it is considered possible the remains of their husbands may be taken there.

C.N. Shops Using Wood

Port Arthur, Ont.—Wood instead of coal is being burned in Northwestern Ontario roundhouses and shops of the Canadian National Railways with favorable results for the labor situation in the district. Hon. William P. Laidlaw, Ontario Minister of Lands and Forests, said here. The railway, he said, agreed to use the wood in substitution for coal formerly imported from the United States.

World-Wide Depression

Vancouver, B.C.—That abolition of world-wide depression depends not on any one nation, but on world co-operation, was indicated by speakers at the meeting of the International Pacific Advertising clubs in annual meeting here.

Bridge Gangs

Calgary, Alta.—Calgary's "bridge band" re-appeared. He entered a home and robbed two women at gun-point of \$9.75. The bandit has terrorized bridge parties for the last month, holding up the players and obtaining all ready cash.

Trans-Continental Flight

Vancouver Sun Plane Lands Safely At Coast Airport

Vancouver, B.C.—Landing their plane, "The Vancouver Sun," at the San Isabel airport here, pilots R. H. Storer and B. R. Ronald completed their trans-Canada flight which started from Montreal.

Originally planned as a trans-Canada nonstop refueling flight, the flyers were forced to break up their flight when a broken oil line forced their ship down near Sudbury and delayed them three hours shortly after their takeoff from St. Hubert aerodrome, Montreal.

Practically the entire flight was made bucking strong head winds and rains which lashed the ship.

REPORTS OF GUN RUNNING ON IRISH COAST

Dublin, Ireland.—President Eamon de Valera was bombarded with questions in the Dail Eireann over alleged attempts to land arms illegally on the coast of the Irish Free State. The president declared the government was at all precautions that the representations warranted.

The discussion ended with Patrick McGillicuddy, former minister for external affairs, declaring he was satisfied and would again raise the matter.

In reply to questions, Mr. de Valera declined to say whether the Free State had sought the collaboration of other governments or had received any offer of collaboration of other governments or had received any offer of collaboration from "another government" to deal with the gun-running.

A member asked if the president was aware that a boat had been searched for arms two weeks ago. Mr. de Valera said the step had been taken in accordance with "general precautions." He declined to say whether boats had been searched at the "other" request.

Unofficial reports some time ago said that vessels of the royal navy were on the look out for vessels reported to be attempting to land arms, probably for the illegal Irish Republican army.

Dairy Probe

Alberta Government Announces Members Of Fact-Finding Committee

Edmonton, Alberta.—Alberta Government announced the members of the fact-finding committee which will study the milk question in the province. Formation of the committee was the result of complaints made by milk producers and distributors over the low price received for their product.

J. J. Bransley, solicitor of the attorney-general's department, is chairman of the committee which will concentrate mostly on the milk situation in Calgary and Edmonton. Every phase of the question from producer to consumer will be investigated by the committee, which will commence its work at once.

Pool and Mouth Disease
Victoria, B.C.—Pool and mouth disease in cattle, prevalent in certain areas in the British Isles, has been definitely traced to the importation of foreign broccoli through scientific investigations conducted by Scottish agricultural organization, says T. G. Coventry, British Columbia minister of agriculture.

CANADIAN MEDICAL MEN COMPLETE CANCER REPORT

New knowledge of the cause and cure of cancer is about to be revealed to the Cancer Institute of London, Eng., by Dr. F. J. H. Campbell (left), who has been working for five years on cancer research for the University of Western Ontario. Dr. Campbell has sailed for England to present the unpublished report which is said to contain many startling discoveries.

COMES TO CANADA

St. Douglas Newton, famous British agricultural expert, who will come to Canada with the British Imperial Conference delegation to advise on matters pertaining to agriculture.

Obtains Her Freedom

Divorce Has Been Granted To Ethel Catherine McLaren

Tenno, Nev.—Ethel Catherine McLaren, known throughout Canada as the "Saskatoon Lily," and rated the most beautiful athlete in 1923 Olympic games, was divorced on grounds of non-support here from James Gillan McLaren of Toronto.

The divorce action was filed last October, but Mrs. McLaren declined to proceed at the time to fear that her residence in Nevada would jeopardize her chances to represent Canada in the coming Olympic games. She refused to discuss her Olympic games plans, but said, however, that she is in training.

The "Saskatoon Lily" and McLaren were secretly married in York township, Ontario, November 25, 1920.

Free State Delegates

Twenty-Five Representatives To Attend Economic Conference

Dublin, Ireland.—It was officially announced that the Irish Free State's delegations to the Imperial Economic Conference will consist of 25 persons and will be headed by three government ministers. Sean T. O'Kelly, vice-president of the executive council; Sean Lemass, minister of industry and commerce; and Dr. Ryan, minister of agriculture.

Senator Johnson, one of the Free State's labor leaders, will accompany the party as an expert adviser of labor problems.

Will Support Party

Alfred Smith Declines To Back Presidential Nominees

New York.—Alfred E. Smith said he would not be a nominee of the U.S. Democratic Party, after expressing an opinion that the formation of a third party would not be practical "at this time."

Smith amplified a prepared statement in the affirmative just once to the effect that his declining to support for the Democratic party included support for its presidential and vice-presidential nominees, Roosevelt and Garner, neither of whom was mentioned by name in the statement.

Wolves Of Algonia
Sault Ste. Marie, Ont.—Wolves of Algonia will start before visitors during Wolf Week, July 25 to 30, without fail. This was the assurance which was given Wednesday, July 6, by the committee in charge, when it was reported nine wolves were available already. Others are being sought. The wild life show will include moose, bear, deer, heaver, mink, and other animals seen in this territory.

A New Racket

American License Plates Cause Quebec Official's Much Worry

Quebec, Que.—The range of human ingenuity in the "racket" business seems to be unlimited.

The revenue (twice of humanity's preoccupation to make or save money is recalled in a statement by Quebec highway officials. They say 1923 license plates of several American states have been imported in quantities, and sold to Canadians who have thus saved license renewal fees.

The beautiful part of it all—for the offenders—is in the officials confessed inability to deal with the offence severely, because of the great number of "real" American citizens at present touring the province.

Stay Was Limited

Churchill, Man.—Tired, wet, cold and bedraggled, the first man to get as far as Churchill in a gate-crashing attempt, arrived here aboard a wheelbarrow. The grain train was carrying one car of lumber. The man crouched between the jutting ends of the timbers. He suffered intense cold. He was sent south on the first train.

CHURCHILL WILL GOVERN FREIGHT RATES ON GRAIN

Churchill, Man.—Churchill will eventually govern freight rates on export grain from the west, according to northern shipping men.

Shipping men believe that the strategic position of the port will have a wide influence over all other North American terminals. They base their forecast on the fact that Churchill is not only more accessible to the overseas ports, but that the saving in time of shipments en route, and the saving in interest on money tied up in cargoes, will bring great volumes of business here.

For instance, it is stated that while the time required in taking the test shipments of last year across the ocean, the ships can make the voyage easily in 12 days, if necessary.

It is pointed out that the Dalziel steamers are high grade vessels, capable of 12 knots an hour. Wheat could be started from prairie points and delivered in the European ports in three weeks.

This gives Churchill a decided advantage over Vancouver, where grain is delivered to ships, which must of necessity take as many as six weeks to deliver grain over the longer route.

Spokesmen of reports from Ottawa to the effect that special companies, costing \$5,000, would have to be installed in ships entering this port, further men here declare that modern ships already are equipped with necessary instruments. They also point out that no pilots are necessary to bring ships in here.

There is deep water at low tide. Ships have radio protection and steam into harbor men here declare that deep water pier and safe anchorage.

Who gets the benefit of the saving in freight rates by shipping wheat via Churchill will be the question asked by the Prince Albert board of trade. It was shown that the rate from Prince Albert to Churchill was 20 cents per hundred pounds, as against 25 cents per 100 pounds from Prince Albert to Fort William.

It is said here that in the case of the sale by the pool to the Continental Grain Company, the pool farmer receives the benefit, since the grain is sold on delivery here. The farmer is said to receive the market price at the country elevator, through the pool, which in turn ships it to Churchill, where it is bought "in storage" by the grain company.

It is pointed out that the grain company has nothing to do with that saving since they bid on wheat "in Churchill." It does not matter to them how it gets here, or what it costs.

The railways do not get the saving. In fact they do not receive as much revenue as they would if Churchill port were not open, and they got the longer haul to the lake head.

On the other hand the Saskatchewan pool, with five terminals at Fort William, where handling charges are collected, profits by no handling charges in this government elevator in Churchill. In order to encourage shipments, the government took off the handling charges on all shipments until after the end of August this year. The charges are approximately one and a quarter cents per bushel.

There is a saving on freight rates of three to five cents on the Churchill route, according to the locations of the northern prairie towns shipping export wheat.

FRENCH SUB IS LOST DURING MANOEUVRES

Cherbourg, France.—The French submarine "Cherbourg" plunged without warning under the waves off Cherbourg harbor while on a trial manoeuvre, taking down at least 60 men in four to seven miles miles north of Cape Vieux.

Seven members of the crew, including Lieutenant Du Mout, the ship's commander, were saved when they were hauled from the deck into the sea by the lurch of the vessel in its unexpected dive. They swam until they were picked up by a fishing boat.

Efforts to locate and salvage the submarine with its imprisoned occupants, began immediately, were impeded by strong currents prevailing at that spot. Search for the sunken craft by naval planes was handicapped by mist and other conditions, which made their job dangerous.

The submarine, in service only two years, was endeavouring to correct mechanical faults when it lost out particularly for diving trials.

The ministry of marine at Paris said the "Prometheus" had not been in perfect working order. Various adjustments had been found necessary before it could be deemed fit for a trial manoeuvre in an open sea, bringing the machinery to perfection that the disastrous trials had been arranged.

It is estimated 40 members of the crew and 17 other men, including engineers and workmen, went down with the ship. The correspondent of the Paris newspaper "Le Matin" estimated the victims at 70.

Sensational Trial Ended

Mrs. Elvira Barney Acquitted Of Charge Of Murder

London, England.—A jury of 10 men and two women found that Mrs. Elvira Barney, 36-year-old daughter of a wealthy baron, was not guilty of the murder of Thomas William Scott, Stephen, her lover, who was shot to death in her flat after a party, May 31.

The verdict was reached after one hour and 33 minutes of deliberation. Mrs. Barney collapsed when she heard it. A short time later, wholly freed, she left the Old Bailey and went to the home of her father and mother, Sir John and Lady Mullens.

The jury also acquitted Mrs. Barney on two other charges—one of manslaughter and another of intent to do Stephen, the son of a banker, grievous bodily harm by trying to shoot him during a quarrel a few weeks before his death.

Giant Stand Of Wheat

Ontario Farmer Has Grain Over Five Feet High

London, Ont.—Farmer Frank Spivey, of Westminister township, proudly surveys his broad wheat fields after reading that the grain stands of the year which promise to produce a better-than-average yield, are about three feet tall. And the reason for this is the fact that the grain stands of the year which promise to produce a better-than-average yield, are about three feet tall. And the reason for this is the fact that the grain stands of the year which promise to produce a better-than-average yield, are about three feet tall.

Library Grants

London, Eng.—Announcement of Carnegie Foundation grants to Canadian university and college libraries will be made in October and November, said Professor Fred London, librarian of the University of Western Ontario. He is a member of the Canadian committee of the foundation.

Belgium's New Tax

Brussels, Belgium.—A transfer tax and luxury tax on products made in or exported direct from Canada and France will be imposed on August 1 by a royal decree for a private bill to cease to have effect with the conclusion of conventions to avoid duplication in regard to the transfer.

Visits London

London, England.—One of the most arresting figures of the war has arrived in London for a private visit—William Hughes, prime minister of Australia from 1915 to 1923, whose ready wit and extraordinary shrewdness caused him to be called the Australian Lloyd George.

Egypt is increasing its import duties on several commodities.

India expects its present cotton crop to total 5,000,000 bales.

Local & General

Miss Lauretta Clever is visiting relatives in Lethbridge.

Mr. and Mrs. Frank Hardisty are visitors in town from Spokane, Washington.

Miss Mildred Boner has accepted a position with the Home Delicatessen in Calgary, and left to take up her duties there last week.

Mrs. C. Boner was a Calgary visitor this week.

Miss Phyllis Bastin returned to Champion Wednesday after a holiday spent in Banff and Calgary.

Ted Fleetwood was unfortunate in gashing his face with a knife Monday, the wound requiring thirteen stitches.

Mrs. Tippet and children who have been visiting Mr. and Mrs. G. Taylor, left for their home in Calgary, Tuesday.

Mr. and Mrs. C. Cronie of Carmangay visited Champion on Saturday.

Mr. and Mrs. M. G. Clever were Lethbridge visitors on Wednesday.

Frank Lobban was a business visitor in town on Tuesday.

P. M. Patterson is a stampede visitor this week.

J. Brown is attending the stampede in Calgary this week. Master Jimmy Brown will return with his father and spend his vacation here.

Mr. and Mrs. Geo. Campbell were business visitors in Calgary this week.

Miss Edna Orr is the guest of Miss M. Orr at Stavelly.

M. F. Hamilton is spending his vacation at Spokane and other coast points.

Mr. Otis Hargraves has been seriously ill during the week but is now on the way to recovery.

Mr. and Mrs. B. Hummel and family were Stavelly visitors Sunday.

Champion would appear to have been fairly well represented at the Calgary Stampede this week to judge by the faces missing on the streets.

Work has commenced again at the Kehoe well, and it is expected that work will continue until the well is completed.

Miss B. Gibbons and Master Billy Duffy are in Champion to spend the holidays with Mr. and Mrs. Milford Sisson.

Don't forget the dance to be held at Alston July 22, with the Sundquist orchestra in attendance.

Mrs. Telcord of Erickson B. C. is visiting at the home of her father, Mr. Sanford.

John Cook was a Calgary visitor this week.

Mr. Voisey of Vancouver is the guest of his son, Mr. Guy Voisey and Mrs. Voisey.

Mr. and Mrs. J. Pellier of Calgary are spending a few days as guests of Dick Howe.

Mrs. Nelson and Mr. Leratus Nelson of Stavelly were visitors in Champion this week and while here renewed old acquaintances.

B. Hummel and F. Caldwell motored to Calgary Monday to take their part in the parade with Vulcan's band.

Mr. and Mrs. Ed Weiss, Mrs. John Ohlbeiser and J. Weiss were Lethbridge visitors over the week end.

The girlscout Carmangay C. G. I. are in summer camp at Arrowwood under the leadership of Mrs. J. Walker.

They say the reason that banks always close at three o'clock is because by that time the manager has got completely dizzy shaking his head.—Sun

Miss Hazel Lyckman and Mr. Douglas Wilson of Carmangay were awarded a free trip to Olds Agricultural School for one week, having received the largest number of prizes in various entries, in the 1931 School Fair. They left Saturday, July 9th, for Olds.

Mattern and Griffin who were making an attempt to set a new speed record for a flight around the world, ended in a peat bog half way between Berlin and Moscow and were forced to abandon their trip.

Mr. and Mrs. Dillingham, who have been visiting relatives and friends in Calgary and McLeod, returned to Champion Thursday and spent a few hours with Mr. and Mrs. Ulrich, later returning to McLeod from which point they left for their home in Oakland, California.

Mrs. J. N. Beaubier, who attended the board meeting of the Alberta Women's Institute, at Edmonton last week, returned to Champion. Calgary has been chosen for the meeting place of the provincial convention to be held next May.

Mr. and Mrs. G. A. Manhard expect to leave for Blackfalds on Friday for a two weeks holiday. This is a certain indication of rain.

A Baby Clinic, under the auspices of the Champion Women's Institute will be held on August 24th, at the home of Mrs. F. G. Alcock. Miss Davidson H. N. of the Public Health Dept. will be in charge.

Mysterious Disease Kills Hoppers

Nature, the producer of the disastrous grasshopper invasion of South Dakota last summer is making amends giving man a "break" in the insect war, a strange malady is striking the insects down by the millions in the vicinity of Crow Creek, in Jessell and Buffalo counties, while the farmers are making every effort to spread the disease.

Although the exact nature of the disease which has attacked the hoppers has not been determined, its virulence is shown by the reports from the farm of George Spreckles where the epidemic was discovered. The hoppers were found dead in millions, still clinging to stems of vegetation.

Bad Cheque Penalty Stiff

Chiefs of police in the province have received copies of the new amendment to the criminal code by which writers of N.S.F. cheques are liable to a jail term on conviction.

The new amendment reads: In any prosecution under this section (dealing with cheques without funds) if it be shown that anything capable of being stolen was obtained by the accused by means of a cheque which, when presented for payment within a reasonable time, was dishonored on the ground that there were no funds or insufficient funds on deposit in the bank to the credit of the accused, it shall be presumed that such a thing was obtained with fraudulent intent by a false pretence, unless it be established to the satisfaction of the court that when the accused issued such a cheque he had reasonable grounds for believing that it would be honored, if presented for payment within reasonable time after it was issued.

Champion Juniors Trim Barons 14-6

The Champion junior baseball team journeyed to Barons on Thursday and came home with the honors, winning the game by a score of 14-6. Good ball was played on both sides, but Champion had the edge on most of the plays.

Miller hustled for Barons the first four innings, and was relieved by Saffert, but this did not stop the Champion boys. Champion's line-up is as follows: A. Latiff, c.; R. McCullough, c.; D. Campbell, 3 b.; B. Cole, p.; P. Bastin, 1 b.; M. Gottenburg, r.f.; D. Stephenson, 2 b.; H. Taylor, l.f.; Max Caldwell, c.f.

In Memorium

In memory of A. B. Caldwell who passed away on July 17th, 1931.

Today recalls a memory. Of a dear one laid to rest.

And the ones who still remember him, Are the ones who loved him best.

Mrs. A. B. Caldwell, Frank and family, Mr. and Mrs. Fred Starr.

Card of Thanks

Mr. and Mrs. N. J. Patterson wish to thank the Women's Institute and Ladies' Aid for flowers received during Mrs. Patterson's illness.

The recent Chevrolet five passenger coach offered by the Robert Simpson Co., for the most appropriate title on the cover page of the diamond jubilee issue of Simpson's catalogue was won by Mrs. E. A. McGowan of Bingley Alta. The title was "Fashions Come and Fashions Go, but Beauty Lives Eternal." A total of 102,000 answers were received in the contest.
